

Sears Headquarters Canada - Security Desk

Location Toronto, Ontario
Designer / Architect Byron Carter Architect
Duration Jan 2001 - May 2001

Scope - A reception desk fabricated from brushed stainless steel with bronze reveals, complete with floating glass top, inner workspace countertop and hinged stainless steel doors.

Highlights - The design intent was to manufacture the desk in a manner as to give the effect that the construction was from solid stainless steel. Soheil Mosun Limited's ability to seamlessly weld the horizontal countertop to the vertical desk fascia achieved this goal and made this desk a magnificent centerpiece in the main lobby of Sears headquarters.
