

Toronto Court House - Security Cameras & Card Access

Location Toronto, Ontario
Designer/Architect Spencer R. Higgins, Architect Inc.
Duration Dec 2009 - Apr 2010

Scope - In anticipation of the G20 summit hosted in Toronto from June 26-27, 2010, Soheil Mosun Limited was contracted to fabricate and install eight (8) custom security camera posts for the Toronto Court House, which is located at 361 University Ave in Toronto; as well as two (2) card access enclosures for the parking lot entrances.

Highlights - The security camera posts are painted galvanized steel with multiple hi-def cameras installed in each. The security camera posts completely surround the court house. At the top of the posts, four (4) 12" spikes are mounted to each post to deter any damage by birds to the posts. Stainless steel caps protect the electronics from moisture and base plates cover the mechanical fasteners for more protection and improved aesthetic appearance. The posts are painted black and are discreet in their appearance by blending with the other exterior architectural elements also present on the grounds.
